CarePort Features Overview

1. About This Document

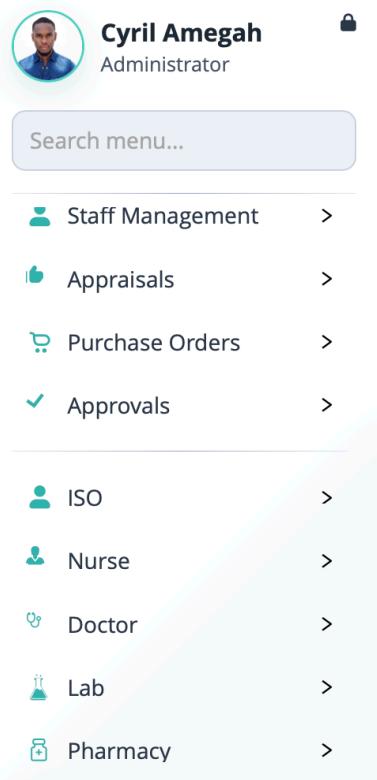

This document explains what CarePort can do for a hospital.

It is written for hospital owners and managers, so you can understand it fast and decide if it fits your work.

It also includes screenshots of images of the system.

2. What CarePort Does

The image shows a screenshot of a mobile application or web interface for CarePort. At the top, there is a user profile section with a circular profile picture of a man, the name "Cyril Amegah", and the title "Administrator". To the right of the profile picture is a small padlock icon. Below this is a search bar with the placeholder text "Search menu...". Underneath the search bar is a list of menu items, each with an icon and a label followed by a right-pointing arrow. The items are: "Staff Management", "Appraisals", "Purchase Orders", "Approvals", "ISO", "Nurse", "Doctor", "Lab", and "Pharmacy". The "Approvals" item has a green checkmark icon next to it.

-  Staff Management >
-  Appraisals >
-  Purchase Orders >
-  Approvals >
-
-  ISO >
-  Nurse >
-  Doctor >
-  Lab >
-  Pharmacy >

CarePort is one system that helps a hospital handle patient work and also handle internal hospital work.

With CarePort, you can:

- Register patients and keep their history
- Manage walk-ins and appointments
- Run consultations, vitals, diagnosis, lab, prescriptions, and treatments
- Bill patients, take payments, and print reports
- Manage medicines stock and hospital purchasing
- Manage staff records, attendance, leave, and payroll setup
- Manage inventory and procurement of items

3. What CarePort Helps You Improve

Faster work

- Faster registration and faster patient movement
- Staff can find patient history quickly
- Less time wasted looking for papers

Better control

- Staff follow one clear process
- Less missing information in patient records
- Better control of billing, discounts, and payments
- Better control of stock and purchasing

Better visibility

- Management can see reports and summaries
- You can track who did what, and when
- You can track staff attendance and leave records

Better accuracy

- Less human error from manual writing and re-typing
- Standard forms and validations reduce wrong entries
- Cleaner records for audits, reporting, and follow-ups

4. Who Uses CarePort

CarePort supports these hospital staff:

- Front desk / reception
- Nurses
- Doctors
- Lab staff
- Pharmacy or storekeeper
- Cashier
- Admin and managers

You can set access based on role, so each person sees what they need.

Search roles		Total Roles 10	+ Add New Role
S/N	Role	Actions	
1.	Administrator		
2.	Nurse		
3.	Doctor		
4.	Pharmacist		
5.	Lab Scientist		
6.	ISO		
7.	Accountant		
8.	Special Assistant		
9.	Physician Assistant		
10.	IT		

5. Modules At A Glance

Module	What It Does	Who Uses It
Patient Registration	Create and manage patient records	Front desk, admin
Walk-Ins	Handle patients who come without booking	Front desk
Appointments	Book and track today, past, and future appointments	Front desk, admin
Visits	Capture vitals, notes, diagnosis, services, treatment, and more	Nurses, doctors
Lab	Send lab requests, enter results, attach lab documents	Lab staff, doctors
Prescriptions	Record prescriptions for a visit	Doctors
Treatments	Track treatment administrations and treatment chart	Nurses
Billing and Payments	Bill patients, receive payments, manage discounts	Cashier, admin
Medicines Stock	Manage stock, add stock, adjust stock, check available quantity	Pharmacy, storekeeper
Procurement	Create purchase orders, submit, approve, and report	Admin, procurement
Inpatient	Admit, manage inpatient notes and vitals, track discharge	Nurses, doctors
Reports	Generate and print hospital reports	Management, admin
Staff Management	Staff records, attendance, leave requests, appraisals	Admin, HR, management
Payroll Setup	Payroll items and payroll grouping	Admin, HR, management

6. How A Normal Hospital Day Runs

1. Patient Arrives

- Staff finds the patient or registers a new patient.
- If the patient did not book, staff records it as a walk-in.

2. Appointment Checks

- Staff can see today's appointments and handle them in order.

3. Visit Starts

- Nurse captures vitals.
- Doctor writes notes and diagnosis.
- Doctor requests lab if needed.
- Doctor adds prescription if needed.
- Staff adds services or treatments done.

4. Lab Work

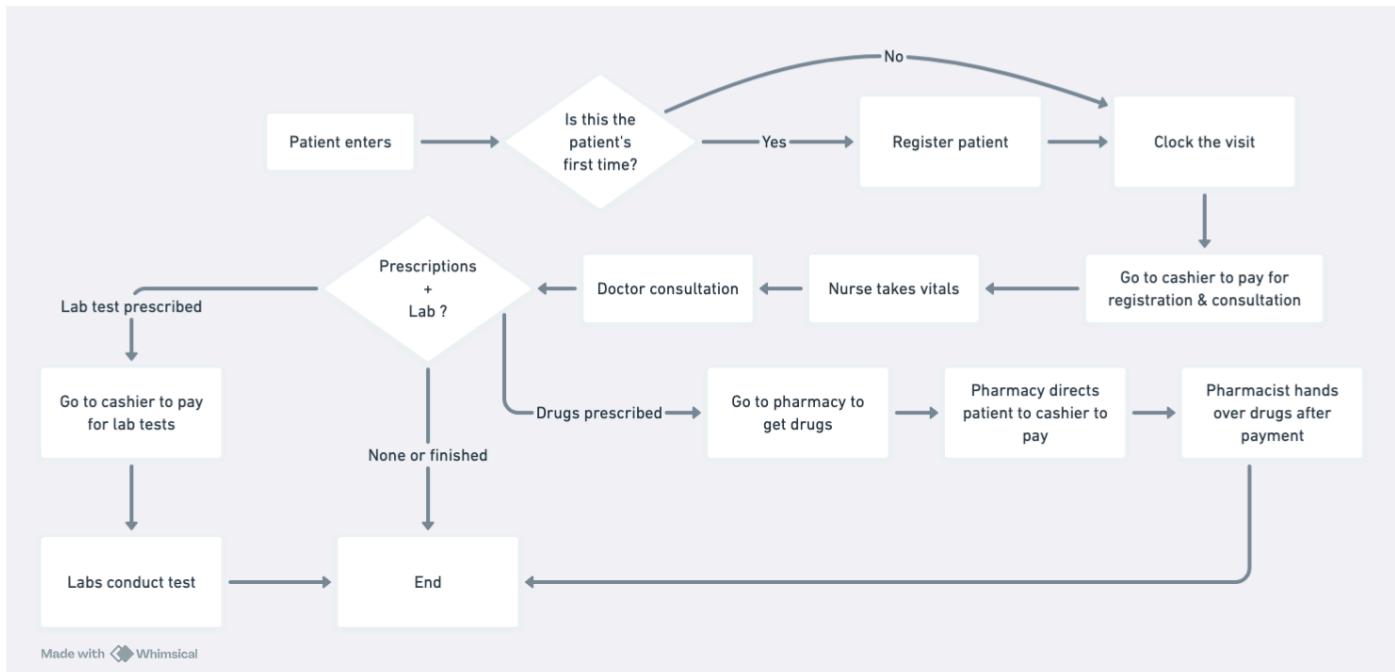

- Lab sees pending requests.
- Lab enters results and can attach result documents.
- Doctor can review results.

5. Billing & Payment

- Billing is done based on what the hospital provided.
- Cashier receives payment and can print receipts or reports.

6. End of Day

- Management generates reports and reviews performance.

7. Key Features By Module

Patient Registration

What you can do

- Create a patient record once and use it everywhere
- Add emergency contacts and doctor information
- Search and find patients fast

Why it matters

- Patient details stay correct
- Patient history stays in one place

Search patients

Doctor's Notes History

Capture and review your observations, assessments, and treatment recommendations during patient visits.

Jun 30, 2025 at 00:31:09 | Dr. Cyril Amegah

Patient is preparing for travel to East Africa for 3 weeks.

Vaccines given: Yellow fever, typhoid, hepatitis A

Advice: Malaria prophylaxis prescribed. Avoid undercooked foods. Keep hydration high.

Plan: Follow-up on return if any symptoms develop.

Jun 30, 2025 at 00:29:07 | Dr. Cyril Amegah

Reason for review: Back pain related to prolonged sitting at work.

Findings: No neurological deficits. Mild paraspinal tenderness.

Assessment: Work-related mechanical back pain.

Plan: Recommend 5 days rest, ergonomic assessment at workplace, and NSAIDs. Physiotherapy referral given.

Jun 30, 2025 at 00:28:06 | Dr. Cyril Amegah

Pre-op review for: Elective hernia repair

Medical history: No comorbidities.

Vitals: Stable. ECG and labs within normal range.

Plan: Fit for surgery under spinal anesthesia. Nil by mouth after midnight.

Feb 4, 2025 at 07:54:16 | Dr.

REFERRED FROM MEDICAL OUTREACH OA SEVERELY ELEVATED BPS

PC: HIGH BPS

10. Quick Summary

CarePort helps a hospital run daily work in one place.

Your team can register patients, run visits, do lab work, write prescriptions, bill patients, take payments, print reports, manage stock, control procurement, manage inpatients, and manage staff.

This helps the hospital move faster and track money and records better.
